(synthetic drugs), 4536; alkylamino compds. (therapeutics against blood parasites), 4537; alkylated aromatic compds., 1136; alkylated naphthalenes, 2188; alkyl chlorides, 1137; alkyl halides, 4228; alkyl phenols, 4228; alkyl phosphates, 3477; alloys, 812, 1382; alloys of Pb with alkali and alk. earth metals, 3434; Al₂O₃, 1223, 5017; Al₂O₃ and HCl, 674; Al₂O₃, etc., 3546; Al, 2377; AlCl₃, 4782; AlCl₃ from clay, 938; Al ethylate, 3718; Al salt soln., 5016; amalgam tank for the electrolysis of chlorides, 3635; amines, 846, 2722; 6-aminoacenaphthene-5-carboxylic acid, 397; amino alics. for pharmaceutical use, 5275; N-aminoalkylamino compds., 3933; aminoalkyl and alkylaminoalkyl compds., 5194; 2-aminoanthraquinone-3-carboxylic acid, 4710; 1-aminoanthraquinone-2-methylketone, 1142; aminoanthraquinones, 2189, 2990; 1-aminoanthraquinone-2-sulfonic acid, 609, 3716; aminoaryl mercaptans, 4350; 1 - amino - 2 - bromoanthraquinone - 4 - nitrile, 851; 1-aminocarbazole and derivs., 3715, aminocellulose derivs., 2822, amino-diarylethers, 2188; 1-amino-4-hexahydro-anilinoanthraquinone-2-sulfonic acid, 1285; 2-aminonaphthalene-3-carboxylic acid, 2191; 2,3-aminonaphthoic acid, 2989; 2,3-amino naphthol and its derivs., 2304, aminonaphthol ethers, 2188, 2-amino-4-nitro-1-benzoic acid, 156, 4-aminopentene-2 and its derivs., 3052; o-aminophenylpropionic acid salts, 2988; aminosulfonic acids, 848; NH₃ in pptn of metal compds. from soln., 4539; NH₃ synthesis, 1726, 3312, 4304, 5279; NH₃ formate-formamide, 3236, NH₄ phosphate, 3546, 4540, 5017, α-amylicinnamaldehyde, 1142; anesthetic, 4300, anhyd. metallic chlorides, 244, 1727, aniline-black and similar dyeing, 5330; anthantrone derivs., 1758; anthranthrene dyes, 3353, anthracene condensation products, 156, anthracene derivs., 2987, 3934, 4829, 5194, anthracene dyes, 1284; anthrahydroquinones, 2447, anthraquinone condensation products, 526, 2580, anthraquinone derivs., 611, 992, 1284, 2189, 2447, 2448, 3233, 3816, 4349, 4350, 4710, 5194; anthraquinone-1,5-dinitrile, 992; anthraquinone-1,8-dinitrile, 717; anthraquinone dyes, 525, 2043, 3815, 5327, anthraquinone glucoside, 3776, anthraquinone vat dyes, 2578, 2834, 3582; anti-moth prepn., 1483; antiseptics, 2535; app. for NH₃ synthesis or other exothermic gas reactions, 5016; app. for catalytic exothermic gas reactions, 4380; app. for coloring, sizing or impregnating of paper webs, 1507; app. for condensing vapors by streams of liquid passed in the same direction, 3832; app. for distg. and other heat treatment of hydrocarbons, 2565; app. for drying and recovery of solvents from various materials, 1314; app. for drying pasty materials, 1314, 1310; app. for dyeing textiles, 5048; app. for electrodeposition of metals from circulating electrolyte solns., 46; app. for electrolysis of fused chlorides, 4150; app. for feeding powd. solids in predctd. ams., 740; app. for high-temp. treatments of hydrocarbons, 2566; app. for low-temp. carbonization of bituminous and oil-bearing materials, 5313; app. for macerating grain, 1186; app. for making AcH from C₂H₂, 3235; apparatus for making artificial silk, 514, 2294, 4072; app. for making artificial silk and winding it under regulated tension, 278; app. for making CS₂, 4306; app. for making films of cellulose derivs., 703; app. for mixing gases in regulated proportions, 2077; app. for refining "raw" CS₂, 1225; app. for reflux distn., evapn. or rectification, 2858; app. for re-winding artificial silk, 3357; app. for sepg. ore and gang by use of air currents, 3431; app. for treating artificial silk on perforated bobbins with liquids,

- 3808; app. for use as a gas producer, burner or for low-temp. carbonization or drying dust or granular materials, 692; app. for use at high temps. and pressures, 1317; app. suitable for making filaments of artificial silk of small "total titre," 514, aq. emulsions of medicines, insecticides, etc., 3052, aralkylated fats and aliphatic acids, 536, aromatic amines, 605, 2187, 2447; aromatic *N*-aminoalkyl-aminoaldehydes, 606, aromatic carboxylic acids, 5195; aromatic esters of the α,α' -dimethyl - γ - hydroxypiperidine - β - carboxylic acid esters, 1995; aromatic hydroxyaldehydes, 1908; aromatic hydroxy compds., 3714; aromatic mercaptans, 1137, aromatic sulfonic acids, 848, 3716, arsenobenzene, 5196; arsenobenzenes (γ m), 2448, artificial fibers, 3099, 4070, 4819, 5317, artificial fibers, films, etc., 3808, 4342, artificial horn, 248, 1729; artificial masses from cellulose esters, 704, artificial resins, 2841, 3821, 4090, artificial rubber, 1528, 2603, 4102, 4103, 5352, artificial silk, 278, 702, 1268, 2570, 3344, 4072, 4342, 4572; artificial silk, films, etc., 1750, artificial silk from cuprammonium cellulose solns., 279, 982, artificial silk from viscose, 2823, artificial tanning material, 5349, 2-arylaminoanthrahydroquinone compds., 607; arylaminoanthraquinones, 3477, aryl ethers of polyalkylene glycols, 610, arylsulfonic acid derivs., 1418; arylthioglycolic acids, 1650, asphalt, etc., 3556, azo dye formed by combining diazotized aromatic amino pseudoamino compds. with arylides of 2,3-hydroxynaphthoic acid, 3582; azo dyes, 285, 286, 524, 525, 715, 716, 990, 1281, 1511, 1756, 1757, 2041, 2301, 2577, 2833, 3105, 3350, 3581, 3812, 3813, 3814, 4080, 4317, 4348, 4578, 4828, 5010, 5325, 5326, azo dyes on "acetate silk," 2837; azo dyes on natural silk, 5326, bacterial preps., etc., analogous to tuberculin, 4301; bacterial products for diagnosis and therapeutic uses, 2252; basic dyes, 716; benzanthraquinone-*peri*-dicarboxylic acids, 1419, 7-*meso*-benzanthreneone derivs., 847, benzanthrone, 1143, benzanthronecarboxylic acids, 1419; benzanthrone derivs., 396, 847, 992, 1138, 1417, 1908, 3354, 3715, 3933, 4710, 4830; benzanthrone dyes, 525, 991, 3108, C_6H_6 , 851; C_6H_6 -contg. product, 1138, benzene synthesis, 2448, benzimidazolonearsonic acid, 609; benzobenzanthronecarboxylic acid, 849; benzodiazine condensation products, 396; benzodiazines, 396, benzoic acid, 5195; benzoyldiaminoanthraquinones, 993; benzyl compds. of Sb, 2187; benzylnaphthalenesulfonic acids, 2449, benzyloxyethanol, 3931; black copying ink, 3820, bleaching, 3112; bleaching fatty substances, 536; bleaching montan wax, 1253, 2811, bleaching wood, 5023; blended "antiknock" motor fuels produced by destructive hydrogenation, 4568, brazing Fe-C alloys, 2926; bromo derivs. of 1,1'-dinaphthyl-8,8'-dicarboxylic acid, 612, butadiene and its homologs, 1143; butadienes, 3715; Ca cyanogen compd., 4028; Ca formaldehydesulfoxylate, 1420, $Ca(NO_3)_2$, 1480; $Ca(NO_3)_2-Al_2O_3-P$ and SiO_2 , 2538; $CaSO_4$, etc., 4028; carhamylaryl-o-thioglycolic acid, 3478; carbazole derivs., 3715, 4483, carbohydrate derivs., 4342, carbohydrate esters, 1750; carbohydrate esters and ethers, 1750, C, 488, 4784; CS_2 , 940, 1481, 2791, 3314, 3780, 4030, 5281, CS_2 and H or water gas, 1481; CS_2 emulsions, 4306; CS_2 used as a solvent with cellulose derivs., 2293; C electrodes for fusion electrolysis, 4151; carbonization of fuel, 3563; CO, 675, 4539; carboxylic acids, 1140, 4578, carboxylic acids of ω -aminoalkylaminonaphthalenes, 2723; casein compns. ("artificial horn"), 2793; catalysts, 1226, 4542; catalysts for hydrogenation and reduction, etc., 247, 3782, catalysts for methanol production, etc., 155, catalytic hydrogenation of C oxides, 2000, catalytic hydrogenation of methylaniline or other aromatic bases, 3236; catalytic hydrogenation of nitrogenous compds., 4483, catalytic oxidation of hydrocarbons, 3078, catalytic oxidation of mineral oils, etc., 4567, catalytic production of H, 4307, catalytic reactions, 1227, 3523, cathodes for making compds. contg. active O, 3635, cellulose, 3097, 3807, cellulose acetate, etc., 4819, cellulose acetates, 1504, 4342; cellulose compds., 1266; cellulose derivs., 703, 1266, 2822, cellulose derivs. and products resembling cork, 3573, cellulose ester and ether solns., 513, cellulose ester compns., etc., 4818, cellulose ester lacquers, etc., 2585, 4089, cellulose esters, 277, 703, 980, 1267, 1501, 2033, 3098, 4570, 4818, cellulose esters and ether-esters, 5041; cellulose esters of higher aliphatic acids, 1749, 2822; cellulose ether compns., 513, cellulose ether lacquers, 5338, cellulose ethers, 981, 5040, 5317, cellulose ethers and esters, 3807, cellulose free from lignin, 979, cellulose halogen carboxylates, 5040, cellulose (hydrated), 703, cellulose pulp, 2823, cellulose solns., 1268, 5317, cellulose xanthogenate, 3344, centrifugal app. for the wet treatment of artificial silk on the spools, 5049; centrifugal box and assoc. app. for producing artificial silk by the dry spinning process, 2823, ceramic material, 4546; ceramic products, 2798, 5292, Ce in the refining of Fe and steel, 4183; charging vessels under pressure, 457, chiolite, 3063; chlorides, 5016, chlorides and bromides of Si and Ti, 244, chlorides of Ca, Mg, Cr, Li and Zn, etc., 1727, chlorinated 1-amino-2,4-dimethylbenzene, 1143, chlorinated org. compds. for impregnating kindling materials, 2557; Cl derivs., 3233; Cl derivs. of 4-nitro-1, 3-xylene, 1649, chloroacetaldehyde, 3235, 3479; 4-chloro-1-aminoanthraquinone-2-sulfonic acid, 4350, 4-chloro- and 6-chloro-5-methylsatin, 27257; 1-chloroanthraquinone-1-nitrile, 717, 3-chloroanthraquinone-1-nitrile, 717; chloro-2,6-dimethylnaphthalene, 613; 1-chloro-2-methylnaphthalene, 613, chromate and alumna, 673; chromic chloride (hydrated), 5017; chromic hydroxide, 4783, Cr compds., 4540, Cr compds. of azo dyes, 716, 2042, 3814, 4080, 4348, 5046, Cr dyes, 1286, 2836, 5327; Cr ores, 366, 1381, 3891; Cr oxide, 1727, 4306, 4836; Cr oxides (hydrated), 3313; Cr salts, 673; cleansing and emulsifying agents, 1228; cloth printing, 5048; cloth-printing dyes, 3107, 5048; coagulating rubber from latex, 4103; coating ferrous metals with Cr or Co, 4436; Co carbonyl, 3058, 5281; $Co(OH)_2$, 674; colloidal S, 3059, 4783; colored cellulosic lacquers, 1517, 2050; colored compds., 718; colored nitrocellulose solns. or paints, 1293; colored pyroxylin lacquers, etc., 2050; colored varnishes, 2309, coloring cellulose esters, 1749; coloring materials for making India ink, etc.,

- 2585; coloring or coating portions of cinematograph film to facilitate identification by inspection of the margins without unrolling, 3867; coloring rubber, 1012, 2851; coloring, sizing and impregnating paper, 2204; coloring, sizing, impregnating or other treatments of paper, 4821; coloring skins, furs, etc., 2306, combustible gases, 3074, comparison photometer for use with ultra-violet rays, 2369, complex compds. of aromatic *p*-diamines with SO₂, 4949; complex Fe compds forming color lakes, 718, compn. for softening and oiling textile fibers, 5330-1; compns. for inking rollers, printing surfaces, etc., 1483, compds. derived from triarylmethane dyes, 717, compds. of indene and phenols, 607, concg AcOH, 1909, 2190, 3932, concg AcOH and other aliphatic acids, 4230, concg caustic alkalis, 5279, concg. ores, coal, etc., by flotation, 2923, condensation of dimethylurea or dimethylolthiourea, 5197, condensation products from C₂H₂ and NH₃, 3933, 5283, condensation products from *p*-halogenated phenolic compds. and aldehydes, 2257, condensation products of ales and ketones with urea, etc., 533, 852, 1518, condensation products of aldehydes and phenols, 942, 3316, 4308, condensation products of aromatic amines and CH₂O, 3114, condensation products of hydroaromatic ketones, 2990, condensation products of indene with phenols, 2539, condensation products of methylol compds of ureas, 1294; condensation products of naphthostyryls, 2045, condensation products of phenols and ketones, 1729, 2540, condensation products of phthalic acid, 849, condensation products of the benzanthrone series, 287, 288, 3718, condensation products of the "benzodiazine" series, 1911, condensation products of urea, 1227, condensation products of urea or its derivs and CH₂O, 2510, contact masses, 3315, conversion of carbonaceous substances into liquid products, 690, cooling liquid, 1230, Cu ammine complex azo compds., 5328, Cu compds. of dyes, 1512, cores for electromagnet app, 4182, cork derivs., 3808, corrosion prevention, 3435, 3658, cosmetics and soaps contg sorbitol and its derivs., 1996, cracking hydrocarbons, 968, 2028, 2290, 5312, crotyl bromide, 851, 3718, crystal salts, 4755; cyanides, 2537; cyan-arylthioglycolic acids, 3354, CNCl, 1223, 4540, cyanogen compds., 1480, cyclic amines, 846, cyclic ketones, 606, 1415, cyclic ketones and quinones, 4229, decolorizing ceramic materials, white pigments, etc., 1732, degreasing raw wool and other textile fibers, 4085, degreasing wool, 536, 1515, 4085, dehydration products of sorbitol, 4282, dehydrogenating hydrocarbons, 1747, denaturing alc., 3300; depolymerization, 846, depolymerizing carbohydrates such as starch and cellulose by treatment with ethylene glycol and monochlorohydrin, 3543; depolymerizing or degrading cellulose and starch, 981; derivs. of aminohydroxybenzenes, 2987; derivs. of arylaminonaphthalenes, 2044, desensitizing agent, 572; desensitizing photographic films, 3177; desensitizing photographic layers, 2380, 2381; desensitizing photographic plates and films, 1359; destructive hydrogenation, 264, 502, 503, 1740, 2276, 2555, 3073, 3074, 4050, 4059, 4328, 4802; desulfurization of viscose products, 705, 1750, 3344; desulfurizing gases, 3797; de-
- sulfurizing org substances, 3934; 1,5-diaminoanthraquinone-2,6-dialdehyde, 1142; 1,8-diaminoanthraquinone-2,7-dialdehyde, 1142; 1,5-diaminoanthraquinone-2,6-dicarboxylic acid, 850; 1,8-diaminoanthraquinone-2,7-dicarboxylic acid, 850; 1,4-diaminoanthraquinones, etc., 2725; diaminoisopropanol derivs., 4778; diarylguanidine, 5197; diazo compds., 1137, 1648, 3715; 1-diazo-5-nitroanthraquinone-2-carboxylic acid, 849; diazonium fluorosulfonates, 4578; diazonium salts, 4229; diazo salt (solid), 614; diazotulfamic acids, 2988; dibenzanthrone, 3717, dibenzanthrone dyes, 286; 2-Bz-1'-dibenzanthronyl and its derivs., 1651; 2,3- and 2,5-dichloro-4-amino-1-methylbenzene, 2044, dichloroaminomethylbenzenes, 2448; 2,3-dichloroanthraquinone-1,4-dinitrile, 717; 1,5-dichloro-2,6-dimethylnaphthalene, 613; 1,4-dichlorophthalazine, 5197, dichlorotoluidines, 396, 4712; diethylmethine-propargylbarbituric acid, 933, *N*-dihydro-1,2,1'-anthraquinoneazine and derivs., 3715, diisopropyl derivs., 1649; 1,6-dimethyl-acenaphthenequinone, 2192; α,α' -dimethyl- γ -benzoyloxypiperidine- β -carboxylic acid methyl ester, 1143; dinaphthylene dioxide quinone, 2990; 2,7-dinitroanthraquinone, 613, dinitrohaloaryls, 1137; diolefins, 4228, 4482, diphtaloylbenzoin, 4951; dis- and poly-azo dyes, 3351; disazo dyes, 4081; disinfectant, 484; disinfectant for seeds, 3770, disinfectants and fungicides, 5001; dispersion agents, 4030; dispersion of org. substances in liquids, 1190, dissocg. S vapor, 1226, 3059; dissolving various org compds., 845; distn and evapn, 919, distn app., 5; distg. oil residues, 4049, disubstituted guanidines, 4710, divinyl, 5197, "dope materials" contg. cellulose esters, 4356, double fluorides, 4782, drench for treating hides, 4844, drying and disintegrating drum for moist materials, 3130; drying damp fuels, 504; drying nitrous gases, 678, dye baths, 529; dyeing, 527, 717, 993, 991, 1286, 1512, 1513, 1758, 2045, 2580, 2836, 3110, 4082, 5047, 5329, dyeing acetate silk, 4831; dyeing "acetate silk" or other cellulose esters or ethers, 1759; dyeing and printing acetate silk, 2045; dyeing and printing cellulose esters or ethers, 1287; dyeing artificial silk, 994, 2580, 3110, 5330, dyeing cellulose derivs., 4351; dyeing cellulose ester or ether silk, 5048; dyeing cellulose esters and ethers, 4350, 4831; dyeing cellulose esters and ethers, etc., 994, 2305, 4831; dyeing fabrics contg. both wool and silk, 2581; dyeing fatty acids, 3583; dyeing fur, hair, etc., 1759; dyeing leather, 3827; dyeing material contg. wool, 4830; dyeing material on dipping frames, 3584; dyeing mixed fabrics, 4830, dyeing mixed fabrics contg. "acetate silk," 3584; dyeing natural and artificial materials, 5329; dyeing piece goods contg. esterified cellulose, 5330; dyeing silk, 2580; dyeing vegetable fibers, 1759, 3355; dyeing viscose fabrics, 5330; dyeing viscose materials, 5048, dyeing "viscose silk," 4351; dyeing with vat dyes, 4350, 4830; dye intermediates, 527, 715, 1511, 1758, 2579, 3169, 3110, 3354, 4079, 4340, 4579, 4829, 5047, 5328; dye intermediates (anthracyl- and anthraquinonyl-alkyl ketones), 715; dye preps., 5047; dye resist for wool and silk, 2837; dyes, 285, 523, 525, 712, 713, 714, 989, 990, 994, 1276, 1277, 1278, 1279, 1510, 1511, 1512, 1756,

- 2040, 2041, 2300, 2575, 2576, 2577, 2632, 3103, 3104, 3349, 3581, 3811, 4078, 4079, 4347, 4577, 4826, 4827, 4820, 5324, 5325; dye salt, 4580; dyes and insecticides, 714; dyes and intermediates, 714, 715, 1283, 1511, 2304, 2579, 3109, 3354, 4079, 4349, 4579, 4829, 5328; dyes and lakes, 3355; dyes for cellulose acetate, etc., 993; dyes for cellulose esters and ethers, 4083; dyes from 1,3,3-trimethyl-2-methyleneindoline, 1285; dyes of the anthracene series, 2043; dyes of the indigo series, 2834; dyes of the isoviolanthrone series, 4578; dyes of the pyrazolanthrone-yellow series, 4349; dyes of the thioindigo series, etc., 4349; dyes of the triarylmethane series, 2834, dye solns. for printing inscriptions on photographic films, 2113, effecting chem. reactions with silent elec. discharges, 4628; elec. furnaces, 3863, elec. insulation, 1261, 2772, electrodeposition of Fe, 1577; electrodes, 1828; electrolysis of brine in amalgam cells, 3862; electrolytic cell, 2376, electrolytic manuf. of compds. contg. active O, 568; emulsifying agents and emulsions, 1453; emulsions, 249, emulsions and dispersions for dyeing, tanning and other purposes, 457; esters, 3713; esters of cellulose, starch, etc., 4818; esters of dicarboxylic acids, 4229; esters of diiodobenzoic acid, 2187; esters of glycols, 610; esters of higher aliphatic acids, 4229; esters of orthosilicic acid, 4709; esters of polyalkylene glycols, 610; ether-als, 3232, ethers of carbohydrates, 846; ethers of cellulose and starch, 4342; 6-ethoxy-8-aminoquinoline, 851; ethyl acetate, 5196; EtCl, 4231; C_2H_4 from C_2H_2 and H, 1910, 3236; C_2H_4 product, 1138, exhaust gases from motors, 1741; exothermic gas reactions, 3284; exothermic reactions, 22; extr. C_2H_2 from gas mixts. by use of acetonitrile as a solvent, 4514; extg. and drying inorg. jellies, 941; extn. of metals, 3432, extn. of oils, etc., 3332, 4558; extn. of oils, etc., from coal, etc., 4330; extn. of products from vegetable materials, 1218; facilitating dyeing of hydrated cellulose, etc., 3110, fatty acids produced by oxidation of paraffins, 3118; fermentation, 3538; fertilizer comprising KNO_3 and $(NH_4)_2HPO_4$, 2780; fertilizers, 1208, 1462, 1984, 2238, 2239, 3049, 3298, 3770, 4011, 4526, 5268; fertilizers (mixed), 927; fibers from viscose or like materials, 3111; figured or multi-colored products of cellulosic derivs., 703, filaments from viscose, 981; films and other products from cellulose esters and ethers, 704, 2032; films, artificial threads, etc., from cellulose ethers, 2822; films, lacquers, plastic compns., etc., contg. nitrocellulose, 4572; films, threads, etc., from ethyl cellulose or similar materials, 4342; fireproofing and fire-extinguishing compns., 4310; fixing basic dyes, 2045; fixing dyes, 287; CH_2O , 1142, 1650, 3717, 5196; formamide, 2191, 4231; formates of the cyclic series, 1138, 1909, 3477; fuel, 3073; fumigating compn. for plants, 4295; fungicides, 1985, 5001; fungicides for seed or grain, 470, 928; furnace for the production of unsatd. hydrocarbons, 3713; gas comprising H and CO, 4030; gaseous catalytic reactions, 247; gases rich in C_2H_4 from tar oils, 5034; gas mixts., 4982; gas producers, 1252, 1741, 2557, 4049; gas production, 2022; gas reaction app., 1022; gas reactions, 1452; gas rich in olefins from bituminous coals, 4330; gas washer with a spiral surface within a tower, 2855; gas washer with distributing disks mounted on a rotating shaft, 1635; gelatin solns., 1305; glucosides, 3052; glycol esters, etc., 1417; Au compd. of the thiobenzimidazole series, 849; greasing leather, 2320; halogenated hydrocarbons, halohydrins, nitriles, isonitriles and halogenated acid chlorides, 4050; halogenation of org. compds., 2446; halogen-substituted tertiary amines, 606; handling cakes of artificial threads, 2582; hardened solid artificial masses, 942; hardening casein, etc., 1482, hardening fats, fatty acids, waxes, etc., 5054, hardening paraffins, wax, etc., 969, 2031, heat treatment of coal, mineral oils, etc., 1249, heliographs, 2671; hexahydroaniline, 1651, 4712, 5197; high-pressure reactions, 5253, hollow articles of fused silica, 4036; hollow quartz articles, 1487; hormones, 1218, 2252, 4778, 5276; hydroaromatic amines, 4949; hydrocarbon conversion, 4557, 4949, hydrocarbon derivs. contg. O or S, 3796, 4802; hydrocarbon oils, 3079, 4566; hydrocarbons, 2722, 5312; hydrocarbons and derivs., 3796, hydrocarbon, by destructive hydrogenation and dehydrogenation, 1730, hydrocarbons from oxides of C and H, 604, hydrocarbons of high b. p., 4050; hydrocarbon synthesis, 1648, HCN, 3312, 3779, 4026, 5015, hydrocyclic compds., 3476, H, 488, 677, 1225, 5282, H and CO, 1728, 3059; hydrogenated acids and esters, 2986, hydrogenated amine, 3934; hydrogenated aromatic amino compd., 3931, hydrogenated naphthostyryls, 1650, hydrogenating aromatic bases, 1907, hydrogenating esters of aromatic carboxylic acids, 154, hydrogenating polyhydroxy compds., 3232, hydrogenation, 3331, 4228, hydrogenation of coal, etc., 265, 1739, 350, 4329, 4802, hydrogenation of the homologs of aniline, 1420, hydrogenation of the oxides of C, 604, H from CH_4 hydrocarbons and steam, 1225; H from mixed gases, 3059, H_2O_2 , 47, 676, 1827, 2667, 3635; H_2S and sulfides, 676, H_2S , etc., 1481; hydroxy acids, 3932; hydroxy aldehydes, 3714, hydroxyalkylamines, 3232, 4949, hydroxyaminobenzenes, 1651; hydroxydiaryl ketones, 2187; hydroxyethylaminobenzene derivs., 3967; 1-hydroxyethylamino-4-hydroxybenzenes, 1143; o-(β -hydroxyethylamino)phenol, 1420; p-(β -hydroxyethylamino)phenol, 4232; N-hydroxyethyl derivs. of 2-amino-1-hydroxybenzene, 2448, 2-hydroxy naphthalene-6-carboxymonosulfonic acid, 609, 2,3-hydroxynaphthoic amide derivs., 612; 2,3-hydroxynaphthyl-2',3'-aminonaphthol methyl ether, 852; 8-hydroxyquinoline, etc., 3931; hydroxyquinones, 5328; 2-hydroxy-3-sulfo-6-naphthalenecarboxylic acid, 2984, hydroxythionaphthenes, 3477, 5191, 5195; "immunizing" seed grain, 470, immunizing wood, grain or other material against fungi, 4793; impregnating substances and adhesives, 2000; improving various natural and synthetic perfumery ingredients by hydrogenation, 4778; increasing the viscosity and lubricating power of oils, 3797, increasing the viscosity of mineral oils, 4567, increasing the wettability of vegetable or animal fibers, 1299; α -indanone, 613; indi-

goid dyes, 716, 1285, 2043, 2302, 4081; indoles, 4484, 4950; indophenol, 848; inks, 1517; inscriptions on photographic film, 340, 2113; insecticides, 927, 3770, 4011; insulating material, 1191, 1971, 5254, insulating oils, 4568; introducing aldehyde groups into cyclic compds., 2446, iodates, 673; I from crude Na nitrate, 3059; Fe carbonyl, 4783; Fe carbonyl compn., 4540, Fe carbonyl in printing textile materials, 3356; Fe₂O₃, 245, 3058, 3780; Fe-O₂ and SO₂ from sulfates, 4541; Fe₂O₃ pigment, 3820, Fe powder, 4922, 5151; isobutyl alc., 4951, isodibenzanthrone dyes, 1757, 6-isopropoxy-8-aminoquinoline, 851; lacquers, 999, 3359, 4836; lacs and varnish, 1356, lactic acid, 2531, 3300; lactic acid and derivs., 849, lakes, 993, 1283, 3110, 3583, 5329, leather, 2320, light-sensitive layers, 4902; light-sensitive Ag halide emulsions, 783, linseed oil varnishes, 3359, liquefaction of nitrous vapors, 3997; liquefaction of tribromoethyl alc., 4951; liquid containers, 4309, liquid fuels, 5306, liquid hydrocarbons, 1135, liquid products from coal, tar, etc., 691, liquid SO₂ in the making of cellulose acet., 4071, liquid treatments of textile materials, 5331; lithopone, 1292, lithopone paints, 721, low-temp. carbonization, 3796, low temp. carbonization of bituminous carbonaceous materials, 4329, lubricating and emulating oils, 2820, luting, 1190, Mg, 5151; Mg alloys, 594, Mg-Al-Si alloys, 1611; Mg and its alloys, 4666; MgCl₂ and Mg(OH)₂ from dolomite, 2791; magnetic cores, 85, maleic acid, 1141, manuf. of hollow bodies, open at one side, from quartz and like refractories, 3321; mastics, varnishes, etc., 1517, material opaque to x-rays, 3409, 3630; measuring the concn. of electrolyte solns., 3174; measuring the intensity of radiations, 5112; mech. purifiers, 4107; medicinal compns. for external use to stimulate cell growth, etc., 482, 2-mercaptobenzothiazoles, 4952, mercuring cotton, etc., 4832, Hg(CNS)₂, 3781; metal carbonyls, 958, 3547, 4029, 4304, metal compds. of dyes, 4830; metallic and NH₄ sulfates, 674, metallic chlorides, 1998, 5280, metals for use as catalysts, 1728; Mo-OH, 3716, 6-methoxy-8-(α -diethylamino-methylbutyl)-aminoquinoline, 1218, 3-(4'-methoxyphenylamino)-1,8-naphthosultam-6-sulfonic acid, 609, α -methylaminopropiophenone, 613, 4-methyl- and 6-methyl-*catin*, 2725, *Bz*-1-methylbenzanthrone, 1143; 1-methyl-2,5-dichloro-4-aminobenzene, 3236; methylene chloride, 2191; methyl formate or similar formates as solvents in purifying oils, 1190, 4-methyl-2-phenoxyquinoline-4'-carboxylic acid, 4777, methylsulfonic acid salts of secondary aromatic-aliphatic amines, 3714; *N*-methyl sulfites and *N*-methanesulfonic acid salts of secondary aromatic-aliphatic amines, 3715, *N*-methyl sulfites of secondary alkyl-aryl amines, 4949; 1-methyl-2,5,6-trichloro-3-aminobenzene-4-sulfonic acid, 849; mineral and tar oils, 4814; mixed esters and ester-ethers of cellulose, 4071; mixed K and NH₄ salts for use as fertilizers, 3536; mixing and agitating app., 2854; molded masses from cellulose derivs., 2822, molded medicinal preps., 1473; molybdates, 3057; mono- and polyhydric alcs., 1416; montan wax, 504, 961, 1253, 1497, 1741, 2277, 3074, 3563, 4330, 4558, 4803, 5307; mordant dye, 716;

dants for seeds, 4011; moth-proof goods, 1231, 2306; moth-proofing articles, 290, 3818; moth-proofing upholstery, etc., 290; moth-proofing wool, fur, etc., 3112, 4581, 5040; motor fuel, 1739; mouth pieces for cigaret holders, 3099; multi-stage mixing or emulsifying app. of the turbine or centrifugal pump type, 5068; C₁₀H₈ and acenaphthene derivs., 1417; C₁₀H₈ condensation products, 3718; C₁₀H₈ derivs., 1139, 1758, 2189, 4349; naphthalene-1,5-disulfonyl chloride, 2192; naphthalene-1,4,5,8-tetracarboxylic acid, 397; 1,8-naphthistatin, 613; naphthistatins, 156; naphthoquinone derivs., 1283, 1758, 3816, naphtho-tyrils, 2190, 2725; 1,8-naphthoxypenthiophenes, 1418, 3933; Ni and Co carbonyls, 2538, 3314, Ni catalyst, 1237; Ni catalyst suitable for hydrogenating processes, 940; Ni(OH)₂, 674; nitrates from nitrites, 5280; HNO₃, 4539; HNO₃ and H₂SO₄, 2537, 4026; 5-nitro-1-1-aminoanthraquinone-2-aldehyde, 1142; 5-nitro-1-aminoanthraquinone-2-carboxylic acid, 850, nitro-2-amino-1-benzoic acids, 3108; nitroanthrone and 2,7-dinitroanthraquinone, 1143; nitrocellulose, 703, 1268, 4071, nitrocellulose lacquers, 4356; nitrocellulose varnishes, 532, 3588, nitro-2,3-dichloro-1,4-naphthoquinone, 1512; nitrosamine printing colors, 4580, oil extn., 2229, oil paints and varnishes, 2584; oils and fats, 2057; ointments, 2252, olefin oxides, 1415; olefins, 1415, olefins and diolefins, 2722, 4483; org. acid anhydrides, 394, org. bases, 2185, 2722, 4227, 4709, org. compds. from coal, tar, etc., 2557, org. Cu compds., 1907; org. hydroxyacids from nitriles, 3478, org. thiocyanate compds., 4482, organo-Ilg compds., 1474, 5276, orthophosphates, 5280; oxidation products of paraffin wax, etc., 1748; oxide mixts., 3057; oxidizing drying oils, 2584, 2840, oxidizing salts, 4027, oxime ethers, 4301, oxygenated org. compds., 154, 2186; packing x ray plates and films, 3857; paper having a glossy surface of regenerated cellulose, 2034; paraformaldehyde, 2450; parchment paper, 5042; percompds. produced electrolytically, 778; perforated hobbins for treatment of artificial silk, 3574; perfumes, 1475, 4024; perfumes from flowers, etc., 1475; phenol, 611; phenol aminoalkyl ethers, 669, 4777; phenols, 3477; 3-phenylamino-1,8-naphthosultam, 613, *Bz*-1-phenylbenzanthrone, 1143, 1-phenyl-2,3-dimethyl-4-dimethylamino-5-pyrazolone, 4952; 1-phenyl-3-methyl-5-pyrazolone, 613, 4485, phenylpropanolmethylamine, 4951; phosphates, 2791, 3780; phosphomolybdo W compds.—lakes, 1512; H₃PO₄, 5279; H₃PO₄-H, 4303, 5016; P, 1226, 2539, 3782, 5018; P and cement, 489, 2539, 3314, 5282, P and Fe-Si, 1226; P, etc., 2792; P from ferrophosphorus, 2667; P₂O₅ and H₃PO₄, 1479; photochem. gas reactions, 5112; photochem. gas reactions such as those of CO and H, 5112; photochem. reactions, 2369, 3408, 3409, photo-copying, 2896; photographic antihalation plates, 1359; photographic developers, 49, 572, 1072, 2113, 3866; photographic emulsions, 1360, 1832, 2380, 4630, 4901; photographic films, 571, 1072, 2112; photographic materials, 2895; photographic plates, 2381, 2895, 3637; photographic printing layer, 49; photographic process, 5123; photographic reversal films, 1859, 1831; photographic reversal process,

- 349; photographic sensitive materials, 349, 572, 781, 1832; photography, 348, 571, 1071, 4154; phthalic acid derivs., 2448; pigments, 998; pigments from volatile metallic compds., 1293, plant treatment, 470; plastic compns., 5018; plastic compns., etc. contg. cellulose esters or ethers, etc., 2540, 4307; plastic compns. from cellulose ethers, 2293, plastic filler for boots and shoes, 4543; plastic materials, 5283; plastic substances, varnishes, etc., 3588; polishing creams, 1730, polyalkylene glycol esters, 2725; polyalkylene glycols and their alkyl ethers, 610, polyazo dyes, 4348, polymerized CH_2O , 4485, polymerized vinyl compds of rubber-like character, 2072; polysaccharide esters, 4229, port. cement, 3068; K, 5282; K and other salts, 1999; KF and NH_4F , 1727, KNO_3 and HNO_3 , 4539, pptg. Cu from solns., 2412, pptn. of viscose solns., 705, prepn. of crystals, 4282; prepn. of metal catalysts, 3315, prepg. cellulose for acetylation, 3343; prepg. cut fibers, 4352, prepg. fibers for spinning, 289, preservation of oils, 275, preserving and waterproofing wood, 4322, preserving foods by coating, 4279, preserving latex, 731, 4103, preserving wood, 4548, 5023, preventing thickening of paints, 998, primary amines of the benzene series, 846; printing colors, 1288, 2305, printing fabrics, 1759, 3584, 4351, 4831, printing inks, 4356; printing on gelatin films, etc., 4630, printing or mordant dyes, 2836; printing photographic gelatin layers, 1579; printing plates, 1730; printing plates and foils, 3062; printing with vat dyes, 1514, 4831; printing woolen fabrics with ester salts of leuco compds. of vat dyes, 3111; producing colored designs on textiles, 2581, production of azo dyes on the fiber, 991, 4348, production of dyes on vegetable fibers, 993; products for effecting emulsifications and for use in tanning, foaming, etc., 4368; products from cellulose esters, etc., 703, protecting Mg and its alloys from corrosion, 369; protecting textile materials against insects, 2306, protecting wool, fur or hair from insects, 3112; protection of org. compds. against lower organisms, 3713, protective layers on photographic films, 571, pure metals, 3655, pure sulfide, 2537; purification of alk. lyes, 2254; purification of brine, 941; purification of synthetic products, 3236, purifying Ca cresolsulfonates, 3307, purifying CO_2 , 4781; purifying gases, 222, 3062, 3283, 3997; purifying gases contg. H_2S , 654; purifying gases contg. P, 677; purifying lubricating oils or oils for Diesel engines, etc., 4061, purifying metallic salts, 4304; purifying oils, 2313, purifying solns. of ZnCl_2 or other metallic salts, 1999, purifying wool grease, 3500, pyrimidone, 1216, pyrazolanthrone derivs., 2044, 4711; pyrogenic decompn. of hydrocarbon materials, 2278, quaternary NH_4 compds., 396, quino-line derivs., 4300; quinoline-indole compds., 4023; quinone anilides, 2044, racemic phenylpropanolmethylamine, 2724, reaction between gases and solids, 3760; receivers for artificial silk spinning, 706, recovering or purifying light metals, 4664; recovery of light metals, 1381; recovery of metals and metal compds. by chlorination and use of ammoniacal solns., 4030; recovery of volatile solvents, 2513, 3523, 4282; recovery of ZnCl_2 in paper making, 515; reducing or hydrogenating org. substances, 4227; reducing the swelling tendency of paper or other cellulosic materials, 2823; reducing vat dyes, etc., 287, 3582; reduction of oxides of C, 1648, refining alc. liquids contg. wort and perfume, 5004; refining Mg and its alloys, 810, 4183; refractory materials, 2006, removing catalyst poisons and other impurities from gases such as N-H mixts., 3060, removing Fe carbonyl from gases, 3284, removing S compds. from gases, 3523, resinous compns., 3114, resists on animal fibers, 720, rubber, 4595, 5352, rubber latex, 3827; rubber (natural and synthetic), 5352, rubber pastes, 4848, rust-proofing metal surfaces, 4838; rust-removing compns., 1106, 2147; safranine dyes, 3583, salts of alk. earth metals, 244; salts of alkaloidal bases, etc., 2251, sepg. CCl_4 and alc. or other liquid mixts. by use of adsorbents such as silica gel, 2514, sepg. gaseous or low-b.p. hydrocarbons, 1228, sepg. gases and vapors, 1451; sepg. hydrocarbon mixts., 3231; sepg. H from assoc. impurities by liquefaction of the assoc. substances, 3284, sepg. H_2S and NH_3 from gases, 1498, sepg. liquids, 3033, 4281; sepg. metals, 2690, sepg. oils from solid substances, 3341, sepg. ores from gang. etc., 3431, sepg. org. gases or vapors, 2986, sepg. of components of oily mixts. produced by the catalytic hydrogenation of C oxides, 1907, sepg. of P from gases, 1226, sesqui oxides (hydrated), 3780, shoe-filling compn., 4031, silica, 3314, silica gel, 3314, 3315, 4029, silicic acid esters, 3056, silicon ware, 1236, silk, 3356; Ag alloys, 2114, 2693, Ag alloys resistant to chem. action, 2693, single-bath chrome-tanning process, 1008, soap baths for treating textile materials, 5597, soap-like products, 2057, soaps, 537, NaNO_3 , 939, NaNO_2 - NH_4Cl , 3781, soft and pliable masses from cellulose esters, 1267; softening paper, 1507, solder for Al, 371, sol. dyes, 3101, sol. metal compds. of monoazo dyes, 2579, sol. products from coal, 3332, solns. of resins, dyes, etc., 1190, solns. of β tri bromoethyl alc., 1217, solvents and dispersing agents, 2229, spent cellulose sulfitic lye, 5041, spinning artificial silk, 705, 4072, stabilizing cellulose acetates, etc., 3343, stable and solid solns. of sulfonic acids, 1515; stable diazo compds., 4711; storage batteries, 1353, 2376, 3634, 3861, 4148, storage-battery electrodes, 777, 1064; strongly adsorbing silicic acid, 936, 2-styryl-4-amino-6-ethoxyquinoline, 613, 851, 1218; N-substituted diamino propanols, 2987, substituted guanidines, 847, 4483; sulfamic acids, 154, 2988, sulfamic acids of the anthraquinone series, 1284, sulfides from S, 4782; sulfonated cellulose derivs., 980; sulfonated fatty acids, 1512, 2045, 2057, 2589, sulfonated wool fat, 4841; sulfonating aliphatic acids, etc., 536, 605; sulfonic acids, 849, 1650, 2190, 2988, 3108, 3716, 4581, 4951, 5196; sulfonic acids of N-acetylacetic aryl amides, 3716, sulfonic acids of 6-chloro 2-amino-1-toluene, 3716, sulfonic acids serving as wetting and emulsifying agents, 2539, 4569, S, 1728; S compds., 608, 1009; S dyes, 716, 2043, 2678, 3815, 3816, 4349, 5047; H_2SO_4 , cement, 5279; support for making films, 703, suspensions and emulsions, 3825; suspensions or pastes of coal, 1496; synthesizing hydrocarbons from C oxides and H, 1136, 1415;

- synthetic drugs, 241, 1724, 4022, 4536, 4777; synthetic gems, 490; synthetic oxygenated org. compds. by catalytic hydrogenation of C oxides, 3933; synthetic resins, 1764, 2309, 3115, 3360, 4837, 5052; synthetic rubber, 310, 2071, 2324, 3600, 4102, 4376, 4848, 5352; synthetic rubber compns., 4848; tanning agents, 4844, 5349; tanning and mordanting pelts in one operation, 1008, tanning and wetting agents, etc., 4368, tanning compns., 1008, 1301, 2319, 2846; tertiary nitriles, 2987; *or*-tetrahydro- α -naphthylamine, 1143, tetrakisazo dyes, 992, 1285; tetranitrodianthrone, 613; tetranitrodianthrone and 2,7-dinitroanthraquinone, 1143; therapeutic Sb compds., 2786; therapeutic complex compds. of metals, 2251; therapeutic double compds. of 5,5-disubstituted barbituric acids with 6,8-dihydroxyquinoline ethers, 5275, therapeutic salts of aromatic bases, 2785; therapeutic thosemicarbazones of arsenophenolaldehydes and ketones, 1995; thiazole derivs., 5013, 5195, thiazoles and azo dyes, 2301, thickening cosmetics and lubricants with montan wax bleached by oxidation, 5013; thio ethers of the anthraquinone series, 1417, thiondigo dyes, 2302, thiomorpholines of the anthraquinone series, 396; thiourea, 2725, 3934, tires from synthetic rubber produced by polymerization of butadiene, 3376, titanate acid, 1222, 3779, 4027, 4539; Ti compds., 673, 1224, 3655; Ti dioxide, 2538, Ti sulfates, 4783, 3-*p* tolylamino-1,8-naphthosultam 6 sulfonic acid, 609, transformation products of cyanonaphthalenesulfonic acid, 288, transparent material for plant shelters, etc., 5019, transparent roofs, 5296; treating artificial filaments with liquids, 4833; treating artificial silk, 3585, treating cellulose with lactic acid, 5316, treating Cr ores, 590, 4920, treating cork with esterifying reagents, 1268, treating gaseous reaction products from elec. arc treatments, 5121; treating gases and vapors electrically, 4150, treating hides and skins preparatory to tanning, 4844; treating liquids with gases, 2514, 4281, treating powd. fuel for internal-combustion engines, 3073; treating regenerated cellulose, 2033, treating rubber latex, 2071, treating threads—sulfonol chlorides, 5331, treating waste alkali lyes, 5041; treating waste sulfite cellulose liquor for further use, 4573, treatment of cellulosic material, 979; treatment of fibers, 3111; treatment of insol. or difficultly sol. dyes, 1286; tracetonepinacolone, 4952, tri-arylmethane dyes, 710, 3353; tribromoethanol from bromal, 851; 1,1,2 trichloroethane, 2724; trichloroethanol from chloral, 852, trisazo dyes, 525, 3814, 4081, 4348, 4578; trypanocidal Sb compds., 670; tubercle wax, 483; unsatd. hydrocarbons, 394, 504, 4050, urea condensation products, 1227, 1482, 3315; urea-CH₂O condensation products, 678, 4357; urethans of secondary alcs., 3476; vacuum jackets for heat insulation, 1971; vanillin, 3717; varnishes, 532, 2050, 3821, 5338; varnishes, films, etc., 3821; varnishing, 2585; varnishing surfaces, 5338; vat dyeing, 4082; vat dyes, 286, 287, 526, 716, 991, 1282, 1283, 1767, 2042, 2302, 2577, 2878, 3106, 3351, 3352, 3353, 3582, 3814, 3815, 4082, 4348, 4349, 4578, 4828, 4829, 5046, 5047, 5327; vat dyes of the anthracene series, 2833-4, 5327; vat dyes of the anthraquinone series, 1283, vermin-destroying compns., 1730, 4786; viscometer, 4378; viscose, 5317; viscose and artificial silk, 514; "viscose silk," 4820; viscose "silk," films, etc., 4572; viscous oils, 3341, 3806; vitamin D, 2252, 5276; vulcanized fiber, 3808; vulcanizing rubber, 3600, vulcanizing rubber latex, 732; washing and other liquid treatments of artificial silk, 2047; washing and other liquid treatments of artificial threads wound on spools, etc., 2047; washing, bleaching, desulfurizing and other treatments of artificial silk in the spinning boxes, 2570; washing gases, 1452; waterproof paper and pasteboard, 4343; water-sol. condensation products, 1140; welding and heating metals by an elec. arc struck in an oxy-H flame, 4924; wetting and emulsifying agents, 4982; wetting and emulsifying substances, etc., 4353; wetting, cleansing and emulsifying agents, 2047, wool fat, 3590, 4586, xylenes, 611, 3931; yarn of mixed natural and artificial silk, 289, see Carpmael, K.; Maschinenfabrik Hartmann A.-G.

- Société "le four chimique rotatif."** Rotary inclined chem. furnace for smelting Pb or Zn ore, P 2413.
- Société de fours à coke et d'entreprises industrielles.** (NH₄)₂SO₄, P 245.
- Société des fours à haut rendements.** Regenerative inversion furnace, P 3833.
- Société française des ateliers de construction de J. J. Gilain.** Crystn. of sugar, P 1007.
- Société française de centrifugation, and ROGERS, J. A. L.** Centrifugal app. suitable for sepg fatty substances from emulsions by use of a volatile solvent, P 726; centrifuge particularly for wash waters from wool, P 1017.
- Société française cinechromatique procédés R. Berthom.** Diaphragm filter for use in color photography, P 1831; optical system for color photography on embossed films, P 1841; app. for prepg. lenticular films for color photography and cinematography, P 2670; optical system for reproduction of color tinted photographic images made on lenticular films, P 4155; color screens for use in color photography, P 4416; optical system for projection and reproduction of embossed photographic films, P 5123.
- Société française de cinématographie et de photographie films en couleurs Keller-Dorian.** Reproduction in colors by optical projection of images made on films with a lenticulated layer, P 782; color photography on lenticular films, P 2670; lenticular films for color photography and cinematography, P 2895, 3887; see also Société du film en couleurs Keller-Dorian.
- Société française des constructions Babcock & Wilcox.** Furnaces, P 1783; burner for oil and powd. fuel, P 2857; burners for powd. fuel, P 4109; see also Babcock & Wilcox Co.; Deutsche Babcock & Wilcox Dampfkessel-Werke A.-G.
- Société française d'exploitation des procédés Sansone.** Neutralization of HCN, P 665.
- Société française des lampes à incandescence Luxor.** Lamp filaments, P 571, 1357; thermionic valve, P 2609.
- Société française des produits alimentaires azotes.** Food product from distillery yeast, P 1698; antiseptic from beer yeast, for use in autolyzing operations, P 4768.
- Société française de produits aromatiques (Anciens établissements Gattefossé).** See Gattefossé, M.
- Société française du "Royal Vichy."** Mineral waters, P 3307.
- Société française de sucreries (Brevets et procédés Deguide).** Soda, P 2255.
- Société Gamichon, Carotte & Cie.** Rotary oven for the com. prepn. of Pb oxide, P 678.
- Société du gaz de Paris.** Refining benzine, P 4049.
- Société générale d'exploitations Industrielles.** Treating asbestos or similar mineral fibers, P 1229; fibers for cement, P 2547.
- Société générale de fours à coke (Systèmes Lecocq).** Nila, P 672; oven for the production of semi-coke and similar products, P 4331.
- Société générale des fours électriques.** Method of operating doors of elec. or other furnaces, P 4108.
- Société générale métallurgique de Hoboken.** H₂SO₄, P 243, 486, 672, 936, 1998, 2537, 4303; Zn ores, P 367; reactions between gases and liquids, P 1188; slag, scoria, etc., P 1490; reaction chambers, P 2858.
- Société genevet et Cie.** Furnaces, P 2610.
- Société Gobert et Charpentier.** Bakery furnace, P 3521.
- Société des grilles & gazogènes Sauvageot.** Charging device for gas producers and other shaft furnaces, P 1020; regulator for air and gas in gas furnaces, P 2077.
- Société Hardoll (anciens établissements Hariveau & Dollmier & E. Porte & Cie réunies).** Delivering liquids in measured quantities, P 920.
- Société H. Gouthière et Cie.** Ketones, P 1415; vinegar, P 1486; removing mildew, etc., P 1483.
- Société industrielle des applications chimiques ("I. N. D. A. C.").** Photographic toning agent, P 1360; removal of wool from skins without attacking the wool or hair, P 2066, 4368; leather tanning, P 3826; purification of Na₂S, P 4306; treating hides and skins before tanning, P 4844; see Botson, R.
- Société industrielle d'applications électriques (B. & R. I.).** Elec. dust sepg. app., P 3803.

- Société industrielle d'applications photographiques (S. A.).** Cinematographic films, P 1831; cinematographic and other films, P 1831; photographic paper, P 2670; photographic films and paper, P 3177; noninflammable cellulosic films, P 4155; thin photographic films sensitized throughout their material, P 4155; fireproofing cinematographic films, P 4631.
- Société industrielle de caoutchouc d'Argenteuil.** See "Sica" (Société industrielle de caoutchouc d'Argenteuil).
- Société industrielle des matières plastiques.** Condensation products of urea and CH_2O , P 489; hardening casein, P 680.
- Société industrielle de produits barytiques.** Lithopone, P 5338.
- Société Inoxi.** See Inoxy (Société à responsabilité limitée).
- Société internationale des combustibles liquides.** Active C, P 676; berginization of coal, P 690, 691; residual berginization gases, P 692; lighting and heating gas, P 960; hydrogenation, P 1496, hydrogenation app., P 3606; estn. of H, P 3641; motor fuel, P 3795; berginization of carbonaceous material, P 3706.
- Société internationale des procédés Prudhomme.** Liquid fuels, P 3331; gaseous reactions, P 5252-3.
- Société internationale des procédés Prudhomme-Houdry.** Product for absorbing vapors from volatile solvents, P 655; regenerating metallic oxides used for desulfuration, P 678; hydrogenation of gaseous products from heavy hydrocarbons, etc., P 698; purifying gases, P 3074, 3907, app for desulfurizing distn. gases, P 3798; treating gases, P 4281; desulfurizing gases, P 4514, 5252.
- Société Jeanjean et Casas.** App. for extg. oil from olives, etc, P 3824.
- Société J. Nelson, Ltd.** See Nelson, J., Ltd.
- Société Karpelès frères.** Centrifugal dyeing app., P 1759, 4083.
- Société Lap.** See Seailles, J. C.
- Société Lemercier frères.** Fireproofing, P 4310.
- Société Lorraine des aciéries de Rombas.** Ferruginous blocks, P 589; refractory bricks, P 2007.
- Société Lumière.** Colored particles for making photographic multicolor screens, P 3867.
- Société Lumifer.** Ornamental surfaces imitating worked metals, 4785.
- Société lyonnaise de soie artificielle.** Esterifying cellulose with CH_3CO_2 and AcOH , P 4571.
- Société Magnier frères (S. a. r. l.).** Glass-making crucibles, P 3552.
- Société maritime et industrielle.** Lubricating oils and fats, P 275; black varnish for metals, P 722.
- Société Le matin.** Crucible furnace for melting type metal, P 811.
- Société meusienne de produits chimiques.** Purifying oils, P 4343.
- Société des mines de Dourges.** $(\text{NH}_4)_2\text{SO}_4$, P 487.
- Société des mines de Lens.** H from CH_4 , P 8782.
- Société minière "La Barytine."** Alk. earth salts, P 3057.
- Société minière "La Barytine," and Raffin, M. Paint,** P 4088.
- Société minière et industrielle franco-brésilienne.** Zr oxide, P 3314.
- Société minière et métallurgique de Penarroya.** Treating ores, P 3891.
- Société nationale de recherches sur le traitement des combustibles.** Catalytic gas reactions, P 456; hydrocarbons and O derivatives, P 604; Fe and Ni carbonyls, P 4541.
- Société Nobel française.** Camphor, P 611.
- Société nouvelle du froid industriel.** Pressure regulator for refrigerators, P 2229.
- Société nouvelle de l'orfèvrerie.** Electrodeposition of Cr, P 4413.
- Société O. Monnet et Cie.** Agglomerating wood charcoal, P 511.
- Société de Paris et du Rhône.** App for polishing wood floors, etc., P 5285.
- Société des perfectionnements appliqués à l'industrie.** Prevention of scale and corrosion in boilers, P 925.
- Société des phosphates tunisiens.** H_3PO_4 , P 3056, 3779, phosphates, P 4028, trisodium phosphate, P 4306; elec. precipitators for H_3PO_4 from fusion furnaces, P 5121, app. for fusing phosphate materials, P 5282.
- Société de photochimie "Elka."** Incol. gelatin-relief images, P 2671, photographic developing, P 4154.
- Société P. Navarre, E Chereau & Cie** Dyeing, P 527.
- Société P. Navarre et fils.** App for sepg. hard substances such as pulp from fruit pulp, P 1315.
- Société de produits chimiques et matières colorantes de Mulhouse.** Dyeing, P 2301.
- Société de produits chimiques des terres rares.** K Nila phosphates, P 4027, Ti paints and pigments, P 4356.
- Société des produits du maïs (S. A.)** Flind starch, P 1767.
- Société "Quartz et silice."** Building tured silica articles by fusing pulverulent silic preformed masses, P 4789.
- Société Raynaud frères.** Tartaric salts, P 666.
- Société Rebours et Dupont.** Burner for liquid fuel, P 1534.
- Société de recherches et d'exploitations pétrolières.** Activation of C, P 676, app for the recovery of gas or vapors by absorbent charcoal, P 1022, app. for the recovery of gases or vapors by use of solid absorbents, P 3381, 3806, gas absorption, P 4514.
- Société de recherches et de perfectionnements industriels.** Furnace for the distn of coal, etc., by treating it with gas or superheated steam, P 739; furnace with several compartments for the distn. of coal, etc., at low temps., P 739; bituminous emulsions, P 919, fuel from coal and oil, P 959, 3073, fuel briquets, P 2020, low-temp. distn. of coal, lignite, etc., P 2021; app. for distg. volatiles from coal, etc., with a counter-current of hot gas or steam, P 5307.
- Société roches et minerais.** Pigments, P 4088.
- Société Rol, Lister et Cie.** Emulsifying agents, P 2001.
- Société "Sildéfours."** Furnace, P 2856.
- Société des textiles roennais.** Wadding from flax fibers, P 5048.
- Société Tubalcain.** Oil burner for metallurgical furnace, P 2144; rotating furnace for liquid steel, P 2925.
- Société des usines chimiques Rhône-Poulenc.**

- Bomb calorimeter, P 4107; synthetic ephedrine (phenylmethylaminopropanol) P 4231; (dimethylamino)-*sec*-butyl *m*-aminobenzoate, P 4300; reinforced glass, P 5291.
- Société pour l'utilisation rationnelle du gaz (Surgaz).** Gas furnace, P 314.
- Société Valencin, Charpy et Besacier.** Artificial silk, P 2838.
- Société des vernis tab.** Varnish, P 2584.
- Société des verreries de Folembay.** Condensation products of phenols and CH_2O , P 5018.
- Socony Burner Corp.** Elec. control system for liquid fuel burners, P 264.
- Soderberg, E.** See Haglund, E.
- Soderberg, G., and Hok, W.** Making and evaluating decorations, 4021.
